Intro to Quick Scan

The Quick Scan technology performs morning and evening scans. As part of the scan process, you can upload the supplements and therapies utilized in your morning and evening routines.

The Quick Scan process uses a sound harmonizing technique that generates a balancing audio frequency. The results provide a frequency recording that balances your current emotional state. The results also provide colors and musical tones to assist in creating the balance you need. The color corresponds to the light wave optical glasses you need. Low and high octaves will be the frequencies out of range.

This technology feature allows you to upload and add your supplements and therapies so the frequencies associated display in your scan results.

The Quick Scan also has energetic frequencies for clearing and shielding your state of balance and energy. Clearing allows you to eliminate negative vibrations from your surroundings. Shielding protects you against any negative vibrations or energy.

In addition, the Quick Scan conducts 3-minute boost sessions to optimize your energetic state for various categories. The frequency boost feature offers the following categories:

- ◆ Super Charge
- ◆ Focus
- ◆ Zen
- ◆ Grounding
- ◆ Neuro Aerobic

The morning and evening scans, and the additional scan features it offers, are designed to be performed every day.

Intro to Inner-Voice

The Inner-Voice technology uses a sound harmonizing technique that generates a balancing audio frequency derived from the voice spectrum in humans to diminish frequencies that are in excess and supplement frequencies that we lack.

The Inner-Voice records your voice and analyzes twelve note frequencies C, C#, D, D#, E, F, F#, G, G#, A, A#, and B.

The Inner-Voice report will display three notes or octaves that are excessively out of balance (or over compensated) as well as the main octave that is being suppressed.

The Inner-Voice reports will also generate the balancing octaves that can assist to create balance in the body. The report will include 4 audio files (MP3) that correspond to each of the balancing octaves outlined in the report. For maximum benefit, listen to these four audio files two to three times a day on your AO Scan device with headphones.

To further strengthen your results, use the recommended colored 'Lightwave Optical' glasses shown on your report.

The Vital Scan mode of the AO Scan Technology performs a complete scan of over 550 blueprint frequencies associated with each bodily functions and performs the analysis in under one minute. This specific scan is a concise snapshot of the Blueprint Frequencies in relationship to the frequencies being produced by the blood, organs, glands, and systems of the body.

To conduct the Vital Scan, a Bone Conductor Transducer Headset by Solex is required.

The scan generates a 24-page data report. The results display the frequencies that are out of range with any blueprint.

- ◆ **Blood report** – Covers a range of blood measurement and displays each category as low, normal, or high frequency levels.
- ◆ **Chakra report** – Displays whether a person's chakra centers are off balance. The report displays each category as low (underactive or cool), normal (balanced), or high (overactive or hot).
- ◆ **Gastrointestinal report** – Displays the balances or imbalances of the Gastrointestinal system frequencies. It displays low, normal, or high frequency levels.
- ◆ **Meridian report** – Displays the imbalances of the 12 Meridian lines. Meridian lines are the energy lines that can be low (blue), normal (green), or high (red) functioning.
- ◆ **Nutritional report** – Displays normal or deficient measurements of mineral, vitamin, amino acid, and enzyme frequencies of the body.
- ◆ **Physical Functionality report** – Displays low, normal, or high frequencies associated with a person's physical ability, bone, muscle, brain and cardiovascular health, hormone, immunity, and organ health.

Our Mission

Our mission is to help each
life we touch
Master Quantum Living
by allowing all
experiences to be empowering.

What is Quantum Living?

Quantum living is an idea pioneered by those such as Dr. Frank J. Kinslow, who combine ancient religious wisdom with thought provoking discoveries in modern science. Quantum Theory discoveries have changed the way scientists view the world, and the implications are astounding. Marina Rose, a Huffpost writer, summarized the meaning of Quantum Living as follows:

“Quantum Living is best described as an extraordinary new approach to living that allows us to see our role in life as that of the active creator, rather than just the passive observer, creatively shaping our experience in a conscious and connected universe. It’s an understanding that in this field of pure energy everything is possible, and knowing this, we live more thoughtfully, understanding every thought, feeling and action is in a delicate and interconnected dance at the deepest quantum level.”

At Solex Global, we share these beliefs, and take it one step further—we are designing tools and technologies to empower individuals to make Quantum Living a reality.
