Introducing **H2O + Hydrogen**, the most effective form of hydration on the market. Solex hydrogen-infused water allows molecular hydrogen to be more quickly absorbed by your body's cells, activating antioxidants and engaging enzymes that provide essential benefits to your body. Hydrogen water provides hydration that lasts longer than traditional filtered water.

Unlike other hydrogen-infused products, our **H2O+ Hydrogen** is exclusively filtered through **Si Bin and Black Tourmaline beads** to give you an even more effective source of hydration with the added benefits of negative ions. Additionally, our filtration process brings total dissolved solids (TDS) down to the least number of particles per million on the market, to ensure you are getting the most highly refined water! With strict filtration standards and negative ion processing, our **H2O+ Hydrogen** is truly in a league of its own, and it's the drink of choice when tested with endurance athletes.
